Subject: Request for extension of public comment period beyond 14 days

We are planning to submit comments regarding Project #3028516. However, we are requesting a minimum 14-day extension of the comment period.

We are co-investigators in research study of merlins, a small falcon species found in Seattle. Merlins have nested near the site of Project #3028516 since 2009 (see the attached maps). This year, a merlin nest was located less than one block from the proposed re-plat.

An extension to the project's comment period, if granted, will allow us time to meet with representatives of local conservation groups, such as the Seattle Audubon Society, so that we may discuss the ecological significance of the trees and other features of the proposed re-plat, prior to the submission of our comments.

Thank for your consideration of this matter.
